

PART NO. 1R12-1231

NEW PRODUCT ANNOUNCEMENT

Introducing the 1R12-1231 Goodyear® Air Spring with Integrated Damping Technology™

The latest innovation in air suspension technology is here: **Part No. 1R12-1231 Goodyear® Air Springs with Integrated Damping Technology™!** Built to perform in demanding field conditions, this advanced air spring contains patent-pending features that generate the damping traditionally provided by external shock absorbers. **This spring has been designed, engineered, and tuned to match OE performance.** By reducing shock and vibration, the spring enhances operator comfort, minimizes fatigue during long hours in the cab, and protects sensitive equipment from excessive wear. The result: longer equipment life, less downtime, and greater efficiency.

In addition to the outstanding durability and long-life of other Goodyear® Air Spring products, this new product contains a patent-pending technology that generates the damping traditionally provided by external shock absorbers. **Unlike other commercially available offsets, our design is tuned to match OE performance.**
